***Allowable Subject Matter***

4. Claims 3,12 are allowed.
5. The following is an examiner's statement of reasons for allowance:

***Regarding claims 3, and 12,*** The prior art of record considered alone or in combination neither anticipates nor renders obvious A method for transmitting frames of data over a wireless access system, each frame having a plurality of data slots, comprising the steps of identifying the types of traffic being transmitted between a first communication device and a second communication device; reserving at least one data slot in a frame for each type of traffic being transmitted between the first communication device and the second communication device and including a control time slot in the frame that identifies the first communication device, and the traffic type of each data slot in the frame and a control time slot in the frame that identifies the second communication device and identifying the types of traffic being transmitted between a radio port of wireless access system and mobile subscriber unit reserving at least one data slot in a frame for each type of traffic being transmitted between the radio port and the mobile subscriber unit.

The prior art of record provided numerous teachings of transmitting frames of data over a wireless access system. However, the prior art of record failed to specifically disclose each frame having a plurality of data slots, comprising the steps of identifying the types of traffic being transmitted between a first communication device and a second communication device; reserving at least one data slot in a frame for each type of traffic being transmitted between the first communication device and the second communication device and including a control time slot in the frame that identifies the first communication device, and the traffic type of each data

slot in the frame and a control time slot in the frame that identifies the second communication device and identifying the types of traffic being transmitted between a radio port of wireless access system and mobile subscriber unit reserving at least one data slot in a frame for each type of traffic being transmitted between the radio port and the mobile subscriber unit.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
